suppliers

PCR Plastics

Supporting a true circular economy

PCR Plastics

Supporting a true circular economy

Our Commitment

Within Weener Plastics' reinforced Sustainability strategy, PCR material has been clearly identified to reduce the use of fossil feedstock.

A dedicated Materials Team coordinates all material selection and testing, and supports customers and the organization with their growing knowledge and experience.

Different PCRs and grades - such as rPP, rPET and rPE - are extensively tested for all types of our products.

Standard designs

Custom designs

Key Characteristics

- Suitable for many product applications
- Mechanical properties matching virgin material
- Good processability
- Wide range of PCR materials and colors available
- Volume agreements with resin suppliers

Color and price vary depending on the requested color and percentage PCR
